DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21, drawn to a method for controlling blood flow in a circuit comprising withdrawing blood, detecting an occlusion, and prompting a response in the controller, classified in class 604, subclass 4.01.
 - II. Claims 22-25, drawn to a method for controlling blood flow in a circuit comprising selecting a protocol, withdrawing blood, detecting pressure, and manipulating flow rate and filtration rate, classified in class 604, subclass 6.09.
 - III. Claims 26-30, drawn to a method for controlling blood flow in a circuit comprising withdrawing blood, detecting an occlusion, and manipulating blood flow rate, classified in class 604, subclass 6.11.
 - IV. Claim 31-38, drawn to a method for controlling blood flow in a circuit, comprising withdrawing blood and controlling ultrafiltrate flow rate, classified in class 604, subclass 6.09.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in Groups I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the methods has separate utility as methods of controlling blood flow in an extracorporeal circuit without the particular steps involved in the other claimed procedures. See MPEP § 806.05(d).

Art Unit: 3762

Furthermore, the individually claimed methods are capable of being combined into one method for controlling blood flow.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
